

## Treatment breakthrough

Traditional braces use rubber bands or "ligatures" to hold the wire tightly to your braces. This results in unwanted friction which can slow the movement of your teeth and requires your doctor to use heavier wire forces.

The tiny doors on Vision LP braces trap the wire without pressing on it. This keeps friction to a minimum and allows your teeth to move easily with greater comfort.

*The next generation of orthodontics really has arrived just in time for you!*

**VisionLP™**  
Passive Self Ligation System

Less time in braces

Fewer appointments

Shorter appointments

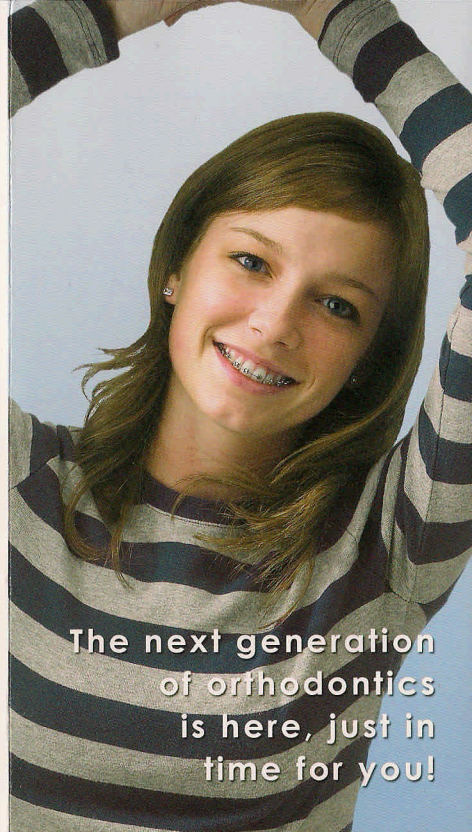

More comfortable

Beautiful results

**The next generation  
of orthodontics  
is here, just in  
time for you!**

**VisionLP™**  
Passive Self Ligation System

## Less time in braces

### Would you like less time in braces?

Your orthodontist and Vision LP can make that happen! Vision LP are new, innovative, low friction braces that speed treatment and get you to a beautiful smile faster than ever before.

## Fewer and shorter appointments

Your time is precious and you don't want to spend it at the doctor's office. Vision LP braces allow longer intervals between appointments as well as easier and faster maintenance visits. Fewer and shorter appointments along with a shorter total treatment time add up to substantial time savings for you. What will you do with your time?

**VisionLP™**  
Passive Self Ligation System

## More attractive

The Vision LP System uses small wires that use **light force** to move teeth. The lighter pressure actually moves teeth faster and far more comfortably.

Vision LP also look great. Without ligatures your braces appear much smaller, giving you a more **attractive smile** during treatment.
